HIDE AND SLEEK.

The MasterBox E500 maintains a sleek aesthetic design without sacrificing practicality. The front sliding panel hides the I/O for a cleaner appearance, while granting easy access to the ports when needed.

The interior of the chassis, the frame, and the sliding front panel are finished in black for subtle, but elegant appearance. The smooth texture of the front panel contrasts the lower front ventilation, tastefully designed in diagonal lines.

A PSU shroud ensures that systems are neatly displayed through the tempered glass side panel. Ample space provides room to build, but also supports extra room for future upgrades. Airflow moves through the case from the front panel and out of the rear, supplemented by ventilation on the top panel with a magnetic dust filter.

FEATURES

Sliding Front Panel - Hide the I/O ports behind the sliding front panel for a cleaner appearance.

Edge to Edge Tempered Glass Side Panel - Showcase your build through the tempered glass side panel.

Top Panel Ventilation – Filtered ventilation on the top panel provides additional thermal support.

Graphics Card Support up to 410mm - You won't ever have to worry about the fit of your graphics card, with support for even the largest, widest cards.

Black Coated Frame & PSU Shroud – A black coated frame and PSU shroud neatly displays system builds.
