POWER UP

The MWE Bronze offers 80 Plus Bronze certification, guaranteeing an average efficiency of 85% at typical load. The DC-to-DC + LLC circuit design allows the unit to convert power to components reliably, efficiently, and safely for better overall performance. This unit operates in silent mode during low load functions and while in standby mode. Not only does this waste less power but it also creates a quieter overall user experience by not running the fan at maximum noise level when unneeded for safe operation. Discrete flat, black cables give users the ability to manage cabling easily with minimal space lost.

FEATURES

DC-to-DC Technology : The DC-to-DC + LLC circuit design offers reliable, stable output to all connected components.

120mm HDB Fan : The hydro dynamic fan bearing creates less friction, making it great for low RPM operations.

Silent Mode : The 120mm HDB fan will remain completely silent during low load operations and while in standby mode.

80 PLUS Bronze Efficiency : This certification guarantees a typical efficiency of 85% under normal operating conditions.

Flat Black Cables : The flat cables take up less space and are easier to manipulate within the chassis.

5 Year Warranty : This unit comes with a standard limited manufacturing warranty of 5 years from the date of purchase.

FEATURES

The DC-to-DC + LLC circuit design offers reliable, stable output to all connected components.

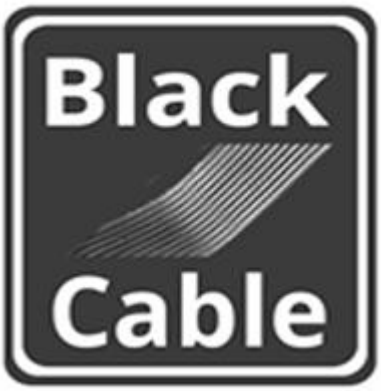

All power comes from a single +12V source, ensuring consistent output through all connected cables.

The hydro dynamic fan bearing creates less friction, making it great for low RPM operations.

This certification guarantees a typical efficiency of 85% under normal operating conditions.

The flat cables take up less space and are easier to manipulate within the chassis.

This unit comes with a standard limited manufacturing warranty of 5 years from the date of purchase.
